## A) About Product

This design has a Product theme, which uses a screen size of 375 x 812 with 40+ screens.

This design has been equipped with a style guide. and have implemented components, and use 4 columns with 24 margins and 20 gutters

## B) Style Guides

In the design, a style guide is available where there are typography, colors and elements

The style guide here is in the form of colors, typography and elements that have been made into components. the component here is a design / object that is usually made because it will be used repeatedly, and when we customize one component, the other parts that we use in the design will also be updated

for example, if we change the color of one of these buttons, then all designs that use the button component will have their color updated

to use components you just need to go to the assets tab and drag and drop the components you want to use like the image below
